

Table A6: Impairments removed from Category 5 based on information received since the 2008 303(d) list was approved. Reasons for Delistings

1. Delisted due to a change in water quality standards – Insufficient or no data to support listing
2. Delisted due to a change in water quality standards – Original water quality criteria used to make assessment are no longer applicable
3. Recent data indicates applicable water quality standards attained

*This AUID represents the headwaters of the Grand Calumet River, which was resegmented for the 2010 cycle to accommodate a site-specific criterion for free cyanide along a one-mile reach. Two of the three new reaches resulting from this resegmentation were found to be meeting the applicable criterion for free cyanide, while the extreme headwater reach was found to still be impaired. This impairment was added back to Category 5 as INK0346_01.
